

HEAT4HEALTH

Heat4Heath aims to support people and their families with health conditions to keep warm affordably in their homes.

This scheme covers Warwickshire, Worcestershire, Coventry and Solihull.

24,000 deaths per year in the UK are due to excess cold

£1 spent on reducing fuel poverty = 42p in NHS savings

There is a direct link between poor health and living in a cold home

Second largest contributor of winter deaths is cold weather

Call freephone 0800 988 2881

Do you know someone in fuel poverty?

Do you know someone with:

Health conditions exacerbated by the cold such as respiratory, circulatory, neurological or mental health needs. They could even be worried about the possible risk of a health condition developing.

What Heat4Health can offer:

- Home visits, phone or virtual consultations
- Speaking with energy supplier on residents behalf
- Practical support and guidance with installing low cost energy saving measures within the home
- Helping residents feel in control of fuel costs and consumption
- Referrals for grants and funding which may be available

How you can help:

Contact your local Outreach worker for more information or to make a referral
